

William Jewell College Department of Nursing

VITAL SIGNS

Summer 2023

INTEGRITY | COMPASSION | SCHOLARSHIP | LEADERSHIP | EXCELLENCE IN NURSING PRACTICE | SERVICE TO ALL

Exciting Updates at William Jewell College Simulation Center: A Path Towards Excellence in Healthcare Simulation

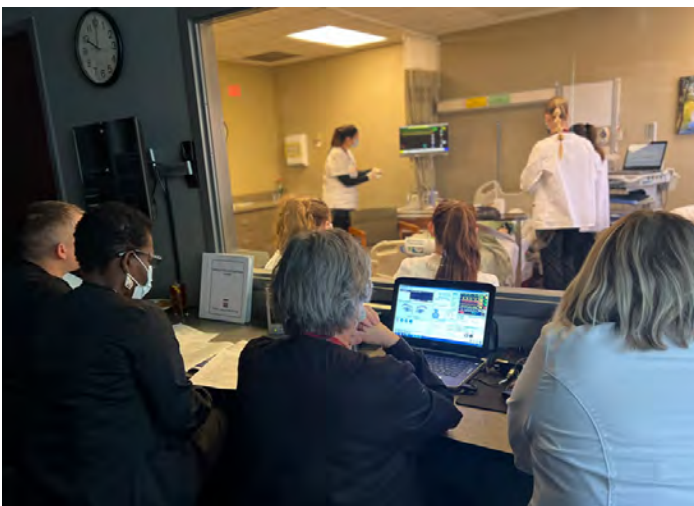

At William Jewell College Simulation Center, we are dedicated to providing high-quality education and training experiences for our nursing students. We are thrilled to share some exciting updates that highlight our commitment to excellence in healthcare simulation. These updates not only align with industry standards but also position us as leaders in the field. Let's delve into the recent developments that have elevated our simulation center to new heights.

Simulation Coordinator's CHSE Certification

We are proud to announce that our Simulation Coordinator, Professor Tiffany Condren, has achieved the Certified Healthcare Simulation Educator (CHSE) certification through the Society for Simulation Healthcare (SSH). This prestigious certification recognizes educators who demonstrate excellence in healthcare simulation. Professor Condren's achievement signifies our dedication to promoting improvements in simulation technology, educational methods, practitioner assessment and patient safety. With her CHSE certification, we are better equipped to provide our students with the highest standard of simulation education.

Integrated Reflective Debriefing Guide

To enhance the debriefing process and facilitate a structured and guided reflection for our students, we have implemented a new debriefing structure using Tanner's Clinical Judgment Model. Known as the Integrated Reflective Debriefing Guide, this approach allows students to actively appraise their cognitive, affective and psychomotor performance within the context of their clinical judgment skills. Reflective debriefing empowers students to take an active role in their learning journey, enabling them to develop and refine their clinical judgment abilities. By utilizing a structured debriefing guide, we create a learning environment that fosters students' growth in clinical judgment.

Exciting Updates at William Jewell College Simulation Center: A Path Towards Excellence in Healthcare Simulation *(continued)*

Alignment with Healthcare Simulation Standards of Best Practice

Our simulation center is committed to upholding the highest standards of healthcare simulation. By applying and adhering to the Healthcare Simulation Standards of Best Practice (HSSOBP), we ensure that our simulation center operates at the forefront of industry guidelines. Our dedication to these standards demonstrates our commitment to providing our students with the best possible learning experiences and preparing them to deliver competent and excellent patient care.

Future Endeavors – INACSL Endorsement

Building on our recent advancements, we have set our sights on seeking endorsement from the International Nursing Association for Clinical Simulation and Learning (INACSL) in Spring 2024. This endorsement will further validate our commitment to excellence and position us as a recognized leader in the field of healthcare simulation. It will serve as a testament to our ongoing efforts to provide the highest standard of simulation education to our students and promote continuous improvement in patient outcomes.

The recent updates at William Jewell College Simulation Center demonstrate our unwavering commitment to excellence in healthcare simulation. Through our Simulation Coordinator's CHSE certification, the implementation of the Integrated Reflective Debriefing Guide and adherence to the Healthcare Simulation Standards of Best Practice, we are creating an environment that fosters exceptional learning and development for our nursing students. As we set our sights on INACSL endorsement, we are excited about the opportunities that lie ahead and the positive impact we can make in shaping the future of healthcare education.

Sim and Lab Receive a Smartcart

In partnership with the Research Foundation of Kansas City, the department will have a new EKG machine and cart along with a Smartcart. The Smartcart is a medication management system that was designed specifically for healthcare training and education. The Smartcart will simulate a medication administration to include bar coding, electronic medical record and drawer opening similar to the hospital setting. Professor Tiffany Condren, Simulation Coordinator, said that this will raise the level of med administration for us in the lab and simulation. This will be a great asset for student learning. Thank you to the Research Foundation of Kansas City and Professor Tiffany Condren and Dr. Anna Kaaiakamanu.

Letter from the Chair

Dear Nursing Alumni and Friends,
I hope this edition of the Vital Signs finds you well and brings you fond memories of your time on The Hill. I am grateful to all the faculty and students who put this newsletter together to share with you. I will update on a few of the department happenings and great news.

We started the Collegiate Nursing Academy in partnership with Liberty Hospital and Liberty Public Schools. This program provides a year-long training for high school students from both Liberty High School and Liberty North. We have 21 high school seniors selected who will begin this fall at Jewell, learning about certified nursing assistant and patient care tech knowledge and skills in the classroom, sim and lab. In the spring, the students will be at Liberty Hospital practicing all their new skills for 100 hours. Upon completion, they can sit for the Missouri certification exam for nursing assistants, interview at Liberty Hospital for a PCT position and be eligible for a scholarship at Jewell. We are all very excited to help high school students learn more about patient care and nursing.

The Diversity and Inclusion Advisory board met for over a year and half to offer feedback on the program's mission, hallmark outcomes and syllabi content. The goal was to provide suggestions to improve communicating inclusivity and belongingness. The Diversity and Inclusion Advisory board was chaired by Kassandra McKnight-Young, '09, along with members Karla Calderon-Gomez, '20; Katie Cazzell, Clinical Compliance Coordinator; Dr. Gina Lane,

Professor Emeritus of Communication; Suleman Lawal, '21; Dr. Rodney Smith, Vice President for Access and Engagement; Joseph Saquee, '15; and Ronald Vergarra, '21. Their suggestions, along with the 2023 Advisory Board suggestions, will be put in place for the 2023-2024 academic year along with the American Association of Collegiate Nurses updates on the core competencies for baccalaureate nursing education.

Great news! Help us extend a congratulations for the 2022 May AT and 3-year track Graduates. Both cohorts had a 100% pass rate. Way to go! This year the NCLEX NextGen changed to a Clinical Judgment Measurement Model and new question formats like bow-tie, drop-down, drag and drop and "extended multiple response." Fortunately, we are The Critical Thinking College! Our faculty and students have focused on clinical reasoning in clinical and the classroom. Predictor scores this year have been amazing! Professor Sarah Light is hard at work supporting this year's graduates.

Though the year was challenging, we continue to provide high-quality nursing education. Our strong commitment from the students, faculty and staff is our cornerstone. Please feel free to contact me if you have questions or suggestions. You have an open invitation on The Hill for any nursing event!

Sincerely,

A handwritten signature in black ink that reads "Leesa".

Leesa McBroom, PhD, APRN, FNP-C,
Chair/Professor of Nursing

COLLEGIATE NURSING ACADEMY

The 2023 Inaugural Collegiate Nursing Academy begins in fall 2023 with 21 seniors from Liberty and Liberty North High Schools. The group will be at Jewell in the fall working on nursing assistant skills and in the spring at Liberty Hospital putting them into practice. The students will be eligible to sit for the Missouri certification exam for nursing assistants, interview at Liberty Hospital for Patient Care Technician positions, and for the Collegiate Nursing Academy scholarship to attend Jewell the following year. Thank you to our partners, Liberty Hospital and Liberty Public Schools.

Teaching High School Students

Taylor Brown, '23 and Kaleena Salazar, '23

We put together a lesson plan on intake and output to present to students at Summit Technology Academy (Lee's Summit School District). The students this service project targeted were high school seniors who are interested in nursing. To help enrich their learning experience, we also talked to the students about how we got into nursing and our experiences as non-traditional students. We taught a lecture on intake and output, why it is important to calculate and which foods count as intake.

We also set up a lab experience for them where they were able to practice calculating intake and output, measuring drainage on a chest tube and emptying a Foley catheter. For visual devices, we made the learning experience as interactive as possible. We placed yellow food coloring and water in Foley catheters to simulate urine and even borrowed a chest tube from the lab with a red ribbon to simulate blood.

We believe this service project is important because there is so much to learn so quickly in nursing school. We love that the skills from this class will give the students

a head start in their college journey and help them to be more competent in their nursing careers. We found that throughout nursing school, the primary way we learn is through teaching; therefore, this was a great refresher on the content we hadn't seen since Fundamentals.

We were extremely impressed with the technology available to the students at Summit Tech. They had an entire room of 15-20 highly advanced manikins and were already getting to participate in simulations about heart failure and diabetes. Simulations can be extremely anxiety-inducing for nursing students, so we love that these students have the opportunity to get comfortable with them early. The students were already competent with calculating intake with unit conversions. We enjoyed the opportunity to see the types of resources available to our next generation of nurses and are so excited that such an amazing resource is available to them.

Nurses Christian Fellowship: Building Relationships, Strengthening Faith and Supporting Nursing Students

At William Jewell College, we believe in fostering a holistic approach to nursing education that encompasses not only academic excellence but also spiritual growth and support. Our Nurses Christian Fellowship (NCF) student organization, sponsored by Professor Tiffany Condren and Wanda Mickelson, provides a nurturing community for nursing students to explore their faith, engage in meaningful discussions and build lasting relationships. We are delighted to share an update on the activities and accomplishments of NCF throughout the last academic year and our plans for the future.

Engaging Bible Studies and Application of Concepts:

Throughout the past academic year, NCF has had an ongoing student participation of 5-15 students. We have gathered regularly to delve into Bible studies, exploring the scriptures and discussing their application in our lives, academic situations and nursing practice. These interactive sessions have provided students with a safe space to reflect on their faith, gain deeper insights and grow spiritually as they navigate their nursing journey.

Building Relationships and Providing Support:

NCF has been instrumental in fostering relationships and creating a support system for nursing students. Through our small, interactive meetings, students have had the opportunity to connect with one another, share experiences and offer support. The NCF community has become a source of encouragement, understanding and friendship, providing a sense of belonging during the challenging moments of nursing school.

Successful Fundraiser for NCF T-Shirts:

We are grateful for the incredible support we received during our fundraiser for NCF T-shirts. The funds raised not only allowed us to provide our members with a gift for our student co-presidents, but also contributed to the sustainability and growth of our organization. We extend our heartfelt appreciation to everyone who contributed to the success of this fundraiser. We also want to say thank you to one of the NCF presidents' parents who kindly donated gifts and snacks to support NCF!

Looking Ahead - Welcoming New Students and Exciting Events:

As we embark on the next academic year, NCF eagerly anticipates welcoming new students to our community. We are excited to create deep and meaningful relationships that will last a lifetime. Be on the lookout for NCF meeting dates and other exciting events sponsored by our organization. We aim to provide a supportive and uplifting environment where nursing students can explore their faith, find encouragement and build connections that extend beyond their time at William Jewell College.

Co-Presidents: Montana Breslford, '23 and Kamryn Gastler, '23

Congratulations to the 2022 May AT and the 2022 3-year cohorts for 100% pass rate on NCLEX!

Teaching Middle-Schoolers CPR

Raven Jones, Kristin Osborn, '23 and Elise Dujakovich, '23

We partnered with the community to teach hands-only CPR at a career fair at a local middle school. We had a table set up with props (stethoscopes, BP cuffs), a bulletin board with fun facts about the heart and two manikins for students to practice CPR. We were able to educate the students on the importance of effective CPR and when CPR should be used. We chose this service project because CPR is an easily learned skill that could save a person's life. This project was also a great, hands-on way to get involved in our community and connect with younger students who may want to be nurses or healthcare workers someday.

We loved this service project because it allowed us to practice the education aspect of nursing and have real-life practice of the “teach back” method, which we’ll frequently have to use with patients before discharging out of the hospital. Connecting with students in our community also made us feel like we were making a bit of a difference! Walking out of the building was a great feeling knowing that we influenced some young minds that day.

Student and Faculty Accomplishments

2022-2023 Faculty/Staff Recognition and Awards

Magalie Acsenvil: *DNP completed*
Magalie Acsenvil: *Daisy Clinical Faculty Award*
Raechel Blades: *Daisy Faculty Award*
Tiffany Condren: *Teaching Excellence Award – Research Foundation of Kansas City*

In Memoriam

Jennifer Blythe attended William Jewell College, graduating in 1996 with a BSN. She did the last four months of her nursing clinicals at Harlaxton College in London, England. She was a nurse at Research Hospital and KU Medical Center. She worked at NKC Hospital for 14-plus years in Pre-Op, Post-Op, Recovery and Pain Management Clinic. Her latest nursing career was at St. Luke's Medical Center on the Plaza in Kansas City. She was a Care Coordinator where she devotedly fought for all patients as a patient advocate. She also worked in the COVID unit in 2020, working tirelessly through the pandemic. Jennifer touched and cared for countless patients in her career. Her contributions to nursing, the profession and our community are many. She will be greatly missed.

Sigma Theta Tau Update

Associate Professor Melissa Timmons, MSN, RN-BC

The Mu Mu Chapter had another great year for 2022-2023! We were excited to welcome 16 high-achieving candidates in our May 2023 Induction Ceremony. We can't wait to see what these amazing nurses will do in their service to others and the community. Please welcome the following new members:

Community Nurse Leaders Jennifer Ryan and Sharra Williams, and BSN Senior Students of Distinction Haidan Baade, Taylor Brown, Alexander Connor, Emilie Dorian, Alexandra Entz, Rylie Foltz, Kamryn Gastler, Clinton Gillespie, Jessica Kane, Jungeun Lee, Avonlea Lichner, Jolee McMullin, Heather Pangborn and Paige Stone.

While the Mu Mu Chapter did not need to provide financial support in printing nursing students' research posters due to its virtual format this year, the chapter did enjoy seeing the joy on a raffle winner's face for our donation of a QT gift card during Jewell's Mind and Heart Symposium fall 2022.

The Mu Mu Chapter and Department of Nursing was blessed to participate in the Winter 2022 Adopt-an-Angel Holiday Program by Saint Luke's Crittenton Children's Center where we were able to fully provide for twin teenagers in foster care plus an amazing haul of general stocking stuffers. In addition, this was a touching and fun service project where we participated in the Adopt-an-Angel Gift Wrapping activity. Before gifts were delivered to the kids, we were among more than 30 different groups who donated their time to wrap presents. With the support and donations received, Crittenton was able to make the holidays special for 515 children in our residential, hospital, foster care and home-based programs. This year, more than 5,000 individual gifts and hundreds of general donations and stocking stuffers were received.

On March 10, 2023, the Mu Mu Chapter again co-hosted the Annual Kansas City Sigma Collaborative Conference titled Annual Embracing Excellence: Incorporating Diversity, Equity and Inclusion through Virtual Platforms to Strengthen Nurse Learning. This conference was held virtually through the support of Liberty Hospital and was a meaningful opportunity for our chapter to support local and regional educational needs. We were particularly proud to support the learning, knowledge and professional development of nurses committed to making a difference in healthcare and education throughout Greater Kansas City. Please contact us if you are interested in participating in next year's upcoming conference, as the conference planning committee is a great way to network and meet other nurses and Sigma members in the Kansas City area. You can find our Sigma KC Collaborative via Nursing Network www.nursingnetwork.com.

We are looking forward to many more activities this coming year! Please contact any Board member if you are interested in joining for the first time or reactivating your membership. If you are already a member, we encourage you to browse the Chapter website and ensure that your contact information is up-to-date so that you can stay in the know. The Mu Mu Chapter Circle website: mumu.sigmanursing.org/home.

Wrapping Group for Sigma/William Jewell College Service, December 12, 2022

Anna Kaaiakamanu, Samantha Anderson, Heather Wilkie and Melissa Timmons

Athletes Saving Lives

Alison Walls, '23 and Gloria Munn, '23

For our service project, we went to a local high school to teach the girls' soccer team Hands-Only CPR. We were inspired to choose this as our service project after learning about the injury of Damar Hamlin of the Buffalo Bills. This event shook the world because, for the first time, many people witnessed the vitality of CPR and other life-saving skills in the event of an emergency. In sports, where athletes heavily depend on their bodies, we realized the lack of education in basic life-saving skills, so we decided to take the opportunity to give back to one of our high schools and try to educate students on the importance and process to perform hands-only CPR.

The biggest takeaway for us was how easy hands-only CPR is to perform but also to teach. It's not a hard concept, yet very rarely do we teach it to those outside of the medical field unless they themselves express a desire to learn it. This would be such an easy skill to teach to all high schoolers, especially athletes. The athletes were attentive, asked questions and were genuinely interested in learning, therefore, it's not a boring topic that people do not want to learn. Imagine how great it would be if hands-only CPR was a mandatory lesson taught in schools as part of PE/Health.

Dog Therapy Service

Ellie Schroeder, '23 and Hannah Asper, '23

We created a service project in which students and faculty could enjoy their time with furry friends in hopes to release finals and testing stress. Volunteers Geoff Wiese and Noah Bruce brought in their furry friends to share the love.

Ellie and I wanted to choose something different and unique as well as do a service project that was considered fun and stress-relieving to many. What we enjoyed about this service project was having the ability to calm some nerves during testing and give students and

faculty a breath of fresh air while playing with the puppies. It was great to see everyone smile. We were very pleased to see some of our friends who came as well as the new faces we got to see and meet. We were very happy to see the great turnout we had.

MSBN awards Grants to Jewell Nursing

The Missouri State Board of Nursing awarded the department two Nursing Education Incentive Program (NEIP) grants in 2022-2023. One grant for \$99,000 will support the inaugural year of the Collegiate Nursing Academy as well as scholarships for Accelerated Track nursing students. The second grant for \$140,000 provides for a supplemental instructor/tutor for first-year students in the sciences and two new positions of a new type of position called Assistant Professor of Clinical Nursing. Thank you to Dr. McBroom for the grant writing and vision for this funding.
