

Department of Mathematics

The Department of Mathematics offers one major and one minor. The mathematics major leads to a Bachelor of Arts degree. The department also offers a minor in mathematics.

Students graduating with a Bachelor of Arts degree in mathematics will:

- Have a solid foundation in undergraduate mathematics necessary for lifelong learning in mathematics and areas related to mathematics;
- Think critically and creatively as mathematicians;
- Develop skills in reading, writing, and presenting mathematical ideas, concepts, and problems;
- Be prepared to pursue an enriching career or advanced study;
- Be able to participate in a scholarly community.

About the Major

All mathematics majors will successfully complete a senior project. For the mathematics and secondary education majors, student teaching is counted as the senior project. For mathematics majors, the project may be a research project approved by mathematics faculty, a formal independent study, or may be done in conjunction with an upper level course completed with the consent of the instructor.

Students majoring in mathematics may receive certification to teach mathematics in grades 9-12 in the state of Missouri by double-majoring in mathematics and secondary education. Procedures to be followed in obtaining teacher certification are included in the Student Handbook for Teacher Certification. Specific course requirements for all certification programs may be found in the Education Department office.

Degree Programs Offered

The Department of Mathematics offers one major and one minor. The mathematics major leads to a Bachelor of Arts degree. The department also offers a minor in mathematics.
