**Section I: Program Information**

## Teachers Prepared

On this page, enter the number of program completers by the subject area in which they were prepared to teach, and by their academic majors. Note that an individual can be counted in more than one academic major and subject area. For example, if an individual is prepared to teach Elementary Education and Mathematics, that individual should be counted in both subject areas. If no individuals were prepared in a particular academic major or subject area, you may leave the cell blank. Please use the "Other" category sparingly, if there is no similar subject area or academic major listed. In these cases, you should use the text box to describe the subject area(s) and/or the academic major(s) counted in the "Other" category.

If your IHE offers both traditional and alternative programs, be sure to enter the program completers in the appropriate reports. For the traditional report, provide only the program completers in traditional programs within the IHE. For the alternative report, provide only the program completers for the alternative programs within the IHE.

After entering the teachers prepared data, save the page using the floating save box at the bottom of the page.

**Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.**

- [Academic Major](#)

**This Page Includes:**

- [Teachers Prepared by Academic Major](#)

### Teachers Prepared by Subject Area

[Back To Top](#)

**Please provide the number of teachers prepared by subject area for academic year 2020-21.**

For the purposes of this section, number prepared means the number of program completers. "Subject area" refers to the subject area(s) an individual has been prepared to teach. An individual can be counted in more than one subject area. If no individuals were prepared in a particular subject area, please leave that cell blank. [\(\\$205\(b\)\(1\)\(H\)\)](#)

**[What are CIP Codes?](#)**

No teachers prepared in academic year 2020-21

If your program has no teachers prepared, check the box above and leave the table below blank (or [clear responses already entered](#)).

What are CIP codes? The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, and 2000 (<https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=55>).

Teachers Prepared by Academic Major

[Back To Top](#)

Please provide the number of teachers prepared by academic major for academic year 2020-21. For the purposes of this section, number prepared means the number of program completers. "Academic major" refers to the actual major(s) declared by the program completer. An individual can be counted in more than one academic major. If no individuals were prepared in a particular academic major, please leave that cell blank. ([§205\(b\)\(1\)\(H\)](#))

Please note that the list of majors includes several "Teacher Education" majors, as well as several noneducation majors. Please use care in entering your majors to ensure education-specific majors and non-education majors are counted correctly. For example, if an individual majored in Chemistry, that individual should be counted in the "Chemistry" academic major category rather than the "Teacher Education–Chemistry" category.

[What are CIP Codes?](#)

Do participants earn a degree upon completion of the program?  Yes  
 No  
 No teachers prepared in academic year 2020-21

If your program does not grant participants a degree upon completion, or has no teachers prepared, leave the table below blank (or [clear responses already entered](#)).

**Section I: Program Information**

**Program Assurances**

Respond to the following assurances. Note: Teacher preparation programs should be prepared to provide documentation and evidence, when requested, to support the following assurances. ([§205\(a\)\(1\)\(A\)\(iii\); §206\(b\)](#))

**This Page Includes:**

- [Program Assurances](#)

**Program Assurances**

[Back To Top](#)

1. Program preparation responds to the identified needs of the local educational agencies or States where the program completers are likely to teach, based on past hiring and recruitment trends.  Yes  
 No
2. Preparation is closely linked with the needs of schools and the instructional decisions new teachers face in the classroom.  Yes  
 No
3. Prospective special education teachers are prepared in core academic subjects and to instruct in core academic subjects.  Yes  
 No

Program does not prepare special education teachers

4. Prospective general education teachers are prepared to provide instruction to students with disabilities.  Yes

No

5. Prospective general education teachers are prepared to provide instruction to limited English proficient students.  Yes

No

6. Prospective general education teachers are prepared to provide instruction to students from low-income families.  Yes

No

7. Prospective teachers are prepared to effectively teach in urban and rural schools, as applicable.  Yes

No

8. Describe your institution's most successful strategies in meeting the assurances listed above: William Jewell College's teacher education program produces effective teachers and meets the Title II Assurances by requiring two early fieldworks tied to coursework that explore all needs of students. Students apply what they learn and build their teaching knowledge, understanding, and skills developmentally. In the summer prior to the start of those fieldwork experiences, students take two courses to acclimate them to the varied needs of students in urban, rural and suburban schools as well as language needs, special education needs, and non-diagnosed needs (including those related to poverty) as well as cultural and linguistic differences; those two courses are EDU 504 Diverse Learners and EDU 175 Culturally Responsive Teaching (can also use CTI 150 Identity & Society for the latter). In these related fieldwork and course experiences, Jewell teacher education students learn and then apply a variety of teaching strategies to meet every student where they are and devise instruction to help them move forward. Jewell prepares our teacher education students to identify the learning needs of every student whether that be because English is not the first language of the student or the student has a disability or the student lacks resources at home or is ill or has experienced trauma or any number of other conditions. Jewell's program teaches a variety of teaching strategies and the skill of knowing when to use what strategy to meet a student's need and then requires that our student teachers differentiate for the class and for individual students. We also employ a co-teaching, student teaching model so that the Jewell student teacher's understanding of the teaching-learning process grows during this experience. To summarize, Jewell teacher education students learn about the varying needs of students, how to address those needs instructionally, and then practice that knowledge

William Jewell College's teacher education program produces effective teachers and meets the Title II Assurances by requiring two early fieldworks tied to coursework that explore all

and develop those skills continuously throughout our teacher education program.

### Section III: Program Pass Rates

## Assessment Pass Rates

The pass rates table is populated from files provided by the testing company or state. The table provides information on the performance of the students in your teacher preparation program on each teacher credential assessment used by your state. In cases where a student has taken a given assessment more than once, the highest score on that test is used. In the case of a teacher preparation program with fewer than 10 scores reported on any single initial teacher credential assessment during an academic year, the program shall collect and publish information with respect to an average pass rate and scaled score on each state credential assessment taken over a three-year period. [\(\\$205\(a\)\(1\)\(B\)\)](#)

Please note that this page does not have an edit feature as the pass rates have already been through several rounds of verification. If you identify an error, please contact Westat's Title II Support Center and your testing company representative.

## Section V: Use of Technology

### Use of Technology

On this page, review the questions regarding your program's use of technology. If you submitted an IPRC last year, this section is pre-loaded from your prior year's report; please review and update as necessary.

After reviewing and updating as necessary, save the page using the floating save box at the bottom of the page.

#### This Page Includes:

- [Use of Technology](#)

### Use of Technology

[Back To Top](#)

1. Provide the following information about the use of technology in your teacher preparation program. Please note that choosing 'yes' indicates that your teacher preparation program would be able to provide evidence upon request. ([§205\(a\)\(1\)\(F\)](#))

Does your program prepare teachers to:

1. integrate technology effectively into curricula and instruction  Yes

No

2. use technology effectively to collect data to improve teaching and learning  Yes

No

3. use technology effectively to manage data to improve teaching and learning  Yes  
 No
  4. use technology effectively to analyze data to improve teaching and learning  Yes  
 No
2. Provide a description of the evidence that your program uses to show that it prepares teachers to integrate technology effectively into curricula and instruction, and to use technology effectively to collect, manage, and analyze data in order to improve teaching and learning for the purpose of increasing student academic achievement. Include a description of the evidence your program uses to show that it prepares teachers to use the principles of universal design for learning, as applicable. Include planning activities and a timeline if any of the four elements listed above are not currently in place. William Jewell College prepares teachers to integrate technology into instruction effectively (Element 1). Students learn to use a variety of instructional tools and practice those throughout fieldwork and student teaching. Jewell Faculty model the use of instructional technology tools and require effective technology use during teaching demonstration classwork. Jewell education students use online learning platforms such as Google Classroom along with utilizing 1:1 tablets, iPads or computers with appropriate instructional software. Jewell students are provided opportunities to use technology such as: projection devices (i.e., Apple TV, Smartboards); graphing calculators; digital cameras/ microphones; and video capture/use. Teacher education students are also exposed to provision of virtual instruction using a variety of programs and applications. In addition to teaching the use of technology, Jewell requires students to analyze instructional demands and select the best technological tools for any given lesson/assessment. Explicit instruction on technology tool use begins in EDU 507, Graduate Instructional Design and Assessment and continues throughout EDU 280 and 308. Application occurs during the student teaching experience. UDL (Element 4) is taught early in the program, during the first summer, to create profiles and to track student learning results (including benchmark assessment scores). This practice is used by Jewell student teachers to design instruction that meets students where they are and to provide differentiation for individuals and groups of students. Jewell student teachers must provide evidence that they are employing a cyclical instruction-assessment-results analysis-instructional design process in their EDU 501 Differentiated Instruction (taken in the fall simultaneously with the first semester of student teaching) and in their online student teaching portfolio. As part of the assessment process, Jewell teacher education students collect and record evidence of student performance and analyze that evidence against standards set by the District and the state. They then analyze that data for patterns in groups performances and/or needs of individual students. Jewell's teacher education students then act on that student performance data analysis, using the information derived therefrom to inform instructional planning and implementation. (Element 2) Evidence of this practice is provided during the EDU 501 Differentiated Instruction course taken simultaneously with student teaching wherein the student teachers demonstrate evidence of K-12 student learning and explain their instructional process for advancing the learning of each student (Element 3). Finally, student teachers participate in Data Teams, Professional Learning Communities, or other like data analysis teams in the schools in which they are student teaching. Jewell students' ability to use technology allows them the opportunity to consider individual and group needs and plan instruction accordingly.

William Jewell College prepares teachers to integrate technology into instruction effectively (Element 1). Students learn to use a variety of instructional tools and practice those throughout

### Section VI: Teacher Training

## Teacher Training

Provide the following information about your teacher preparation program. ([§205\(a\)\(1\)\(G\)](#))

### This Page Includes:

- [Teacher Training](#)

### Teacher Training

[Back To Top](#)

1. Provide a description of the activities that prepare general education teachers to:
  1. Teach students with disabilities effectively William Jewell College prepares general education teachers, throughout the teacher education program, to instruct students with disabilities. There is a primary focus on meeting every student where they are and teaching them effectively for growth. William Jewell's first professional content course, EDU 504, Diverse Learners, focuses on how children develop and how to teach for development, whether that development follows age/stage trajectories or when there are underlying physical conditions or brain information processing differences that need specific instructional approaches. In addition to this foundation of child development/exceptionalities and how teachers must respond to promote learning, the course also engages the teacher in identification and referral of students for special education testing/diagnosis; the teacher's legal obligations under IDEA and Section 504; the use of the results of various diagnostic instruments; the mechanics and process of creating and reading an IEP; participation in IEP

conferences; and a variety of teaching strategies to meet the needs of all of the above populations (including RTI and universal design). Teacher education students build on this knowledge in EDU 507 Graduate Instructional Design and Assessment by applying understanding of development of instructional and assessment planning to how P-12 students grow and learn. In EDU 501, Differentiated Instruction, teacher education students analyze the individual readiness, interests, and needs of a class of students and design effective instruction for that class. Teacher education students design differentiated lessons and assessments for specific student needs and measure and identify how all students' progress toward standards-based objectives. Teacher education students also consider how assessment data informs instructional activities to promote individual student progress. These teacher education students differentiate from concrete to abstract, from structured to less structured, and use flexible grouping, tiering and individual tools used to facilitate individual growth and learning. The individual needs of students are addressed instructionally as part of these processes. Teacher education students apply these knowledge and skills during fieldwork and student teaching (EDU 510, 511). Each of these experiences requires the teacher education students to monitor students with needs, whether they be disabilities, giftedness, non-English language, developmental, experiential or socioeconomically based. William Jewell requires every undergraduate teacher education student to teach for a full year and meet the needs of Special Education, Limited English Proficient, Gifted, and other needs of the students in their class. In EDU 520, Graduate Student Teaching Seminar, student teachers are required to discuss how they have planned and implemented effective modifications, adaptations, and accommodations for IEP, LEP and non-diagnosed students during student teaching. Required courses and experiences vary by field but all include the complexities of child language acquisition, development, the use of receptive and expressive language, both oral and written. A brief listing of the key ideas that prepare Jewell elementary teacher education students to individualize instruction for special education and ELL students are: language acquisition and development, second language acquisition, academic language promotion, autobiography, conferencing, pre-writing, 6+1 traits of effective writing, listening for meaning, oral expression as a bridge, phonemic awareness, phonics instruction, word attack skills, vocabulary development, instruction for comprehension, scaffolding literacy learning, reading/writing assessment, individualization for LEP reading learners, leveled/leveling books, RTI, IRI, running records, differentiated study guides, differentiated instruction, fluency,

William Jewell College prepares general education teachers, throughout the teacher education program, to instruct students with disabilities. There is a primary focus on meeting

motivation, assessment and remediation (EDU 280, 308).

- Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*. William Jewell College prepares teacher candidates to participate as a member of individualized education program (IEP) teams in our first course, EDU 504 Diverse Learners. Candidates then observe IEP meetings as the opportunity arises during fieldwork and appropriately participates (as a student, not a teacher of record) in IEP completion and conferences during student teaching. WJC teacher candidates are taught how to identify students with disabilities, how to refer them for testing, services, and how to provide teacher information for an evaluation process. WJC teacher candidates understand their legal obligations under IDEA and Section 504 and the mechanics of creating an IEP. Finally, in this class they practice reading and interpreting various diagnostic instruments and then complete an IEP and conduct a mock IEP conference. During student teaching (EDU 510/511) Jewell teacher candidates utilize IEP and 504 plans to plan effective instruction for the students in their student teaching classrooms and participate in IEP/504 conferences as is appropriate (can participate as the teacher of record IF approved for an Internship and hired by the District per Jewell, District and Missouri policies).

William Jewell College prepares teacher candidates to participate as a member of individualized education program (IEP) teams in our first course, EDU 504 Diverse Learners.

- Effectively teach students who are limited English proficient. William Jewell prepares teacher candidates to effectively instruct students who are limited English proficient through course and field work experiences. Midway through the program, after they understand basic teaching-learning concepts, Jewell teacher education students take literacy courses that help them understand language acquisition and second language acquisition (EDU 308) and introduces them to strategies for promoting language acquisition (written, oral, reading, listening, speaking), production, and comprehension. They also learn to diagnose student reading level (IRI & other diagnostic instruments); identify text readability; create leveled reading material; provide scaffolding; assess student performance/comprehension; adapt texts; create modifications and accommodations; produce differentiated study guides; provide comprehension support; and implement instruction flexibly to meet student needs. With this basic knowledge about how to promote language development in LEP students, Jewell teacher candidates practice what they have learned in their student teaching classroom (EDU 510/511). In the simultaneous class, EDU 501, Differentiated Instruction, student teachers identify how they will meet the needs of the LEP learners in their student teaching classroom and implement instruction accordingly selecting the appropriate strategies from those described above to meet the needs of their specific students.

William Jewell prepares teacher candidates to effectively instruct students who are limited English proficient through course and field work experiences. Midway through the program, after

- Does your program prepare special education teachers?  Yes  No

If yes, provide a description of the activities that prepare *special education teachers* to:

- Teach students with disabilities effectively

2. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education*

Act.

3. Effectively teach students who are limited English proficient.

**Please use this space to provide any additional information that describes your teacher preparation program(s). You may also attach information to this report card (see below). The U.S. Department of Education is especially interested in any evaluation plans or interim or final reports that may be available.**

Jewell's Alternative Teacher Education program is housed in a Master of Arts in Teaching program that can be completed in one or two years according to student choice. Coursework is provided face-to-face or in a hybrid format. The program requires full-year student teaching and is structured so that MAT candidates enter the classroom in the first semester in the program. Emphasis is on connecting theory to practice through application of learning directly in the classroom. During student teaching, our teacher candidates participate in a co-teaching model. Teacher candidate instruction focuses on high leverage, research-based teaching strategies. During student teaching, teacher candidates apply principals of differentiated instruction to foster individual student growth and achievement. WJC Education faculty members ensure that the teacher education program continuously evolves to meet the emerging needs of schools and students through research and by accompanying our students into the classroom and collaborating with our K-12 colleagues. As a liberal arts college with a long-standing tradition of rigorous preparation, all of our departments hold high standards for student performance. The quality of our graduates is recognized by area schools as evidenced by an average 90%+ placement rate of our teaching graduates in school positions within two-years of graduation over the past 20 years. The strength of our liberal arts programs makes Jewell the ideal place to prepare teachers who think critically. The alternative program was started during the 20-21 academic year and so far has averaged 10 candidates per year.
